## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 ~ 36, 132 ~ 166, 182 and 183, drawn to a method of providing a heat conductive semiconductor package, classified in class 438, subclass 1+.
  - II. Claims 37 ~ 131 and 167 ~ 181, drawn to a semiconductor package, classified in class 257, subclass 721.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as hermetically sealing a semiconductor chip within a package, said package enclosing a first gas at a first temperature and a source of releasable hydrogen.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status

Art Unit: 2815

in the art because of their recognized divergent subject matter, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. If applicant elects the device of Invention I, then the following election of species applies:

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

- i) Species I depicted in Fig. 3.
- ii) Species II depicted in Fig. 5.
- iii) Species III depicted in Fig. 11.
- iv) Species IV depicted in Fig. 12.
- v) Species V depicted in Fig. 15.
- vi) Species VI depicted in Fig. 18.
- vii) Species VII depicted in Fig. 19.
- viii) Species VIII depicted in Fig. 20.
- ix) Species IX depicted in Fig. 21.
- x) Species X depicted in Fig. 22.
- xi) Species XI depicted in Fig. 23.
- xii) Species XII depicted in Fig. 24.
- xiii) Species XIII depicted in Fig. 25.

Art Unit: 2815

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
